Homework 9

Read DDI chapter 6 "Improving Query Efficiency."

Take brief notes on the chapter. Investigate how to implement triggers and views using SQLite. Take brief notes on the basic trigger and view syntax.

Using the Internet, conduct a search for SQLite performance or tuning SQLite. Choose one resource you find interesting, and create a Piazza post that includes the URL of the resource and your brief discussion of what that resource reveals. (100 - 200 words)

All quizzes are open-note.

(Hint: You will be quizzed on basic trigger syntax and view syntax, adhering to SQLite's convention.)
